

ROADMAP 2024

POWER

- Specific agents for each operating system
- Improved checks for efficient monitoring

FLEXIBILITY

- Specific monitoring of virtual environments
- Monitoring of cloud environments
- Monitoring of Docker environments

VANGUARD

- Deployment on Kubernetes for licenses aimed at large environments
- Entry version available for download and usage via Docker

USABILITY

- User interface with the latest UX techniques
- Improvements in interface access control (UI-ACL)
- Customized reports
- Simplified business processes
- Advanced notification system
- Self-management system

INTEGRATION

- Development of monitoring packs for automatic deployment of monitoring in large environments

OBSERVABILITY

- UX monitoring
- Application Performance Monitoring (APM)
- Synthetic monitoring
- Passive monitoring in SDN environments
- Security monitoring
